

Carla B Hara Animal Communicator & Animal Hospice Support

*Until one has loved an animal a part
of one's soul remains unawakened.*
-Anatole France

It is one of my greatest passions to help you and your animal build a stronger bond and to understand each other on a deeper soul level. Animals speak from their heart and come from a place of pure love. They teach us so much and love us unconditionally.

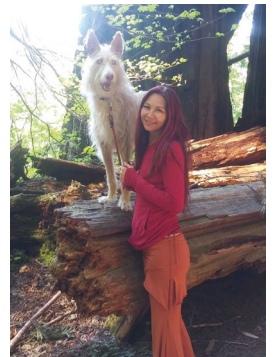

Do you often wonder what your animal is trying to tell you? Are they experiencing any health or behavioral issues? Do you often wonder how they are feeling? Wonder what their wants and needs are that you may not be aware of? Have you been curious about specific messages they may want to share with you? Or maybe you have end of life questions for them?

I connect with animals on a telepathic level. When doing this work I tap into the four senses of intuition known as clairvoyance (seeing images), clairsentience (recognizing feelings), claircognizance (knowing) and clairaudience (hearing voices). My intuition tends to favor clairvoyance when I connect with animals as most of the messages come through in forms of movies and images.

Connecting with animals on many different levels, I believe, is my soul's work. **The services I offer are: communicating with your companion animal, communicating with an animal-in-spirit and animal hospice support.**

End of life support can include: supporting you with end of life care for your beloved animal such as animal vigil support (which can include animal reiki, using flower essences, healing crystals, aromatherapy, etc. to help support vibrational and emotional harmony), animal memorial, cremation and euthanasia support on a case by case basis as well as support connecting with an animal-in-spirit after an animal transitions.

It would be an honor for me to help you connect with your beloved animal or support you and your beloved animal during the end of life transition.
